new and innovative approach to both designing
and analyzing proposed and existing facilities
for ADAAG compliance With its emphasis on
physical accessibility, the Americans with
Disabilities Act Accessibility Guidelines
(ADAAG) have far-reaching implications for the
design or renovation of virtually all public-
use buildings and sites in the United States.
Yet there has been little guidance on how to
design and review the drawings and
specifications of an existing or proposed
facility to assess its ADAAG compliance. This

invaluable reference provides such guidance at last for architects, interior designers, landscape architects, engineers, builders, planners, facilities managers, specification writers, construction code officials, teachers, and students, as well as individuals concerned with access issues. The authors present the ADAAG in an easily understandable format grouping ADAAG criteria into detailed checklists for specific interior and exterior spaces such as offices, classrooms, retail shops, restaurants, restrooms, and parking garages. This sensible approach makes the review process of any room, building, or site highly manageable. For additional convenience, the presentation parallels the design process from schematic design through construction documents, including detail, schedule, and specification review. Complete with review forms, checklists, graphics, and other information necessary to ensure ADAAG compliance, this thorough guide will prove invaluable to everyone involved with the design or retrofit of accessible buildings and sites.
