calculator calculate the area of a square rectangle**

**web noun any flat curved or irregular expanse of a
surface the extent of a two dimensional surface
enclosed within a specified boundary or geometric
figure the area of ireland the web definition of area 1
as in region a part or portion having no fixed
boundaries i last saw your dog over in that general
area synonyms similar words relevance region zone
corner web definition area is defined as the total
space taken up by a flat 2 d surface or shape of an
object take a pencil and draw a square on a piece of
paper it is a 2 d figure the space the shape takes up
on the paper is called its area now imagine your square
is made up of smaller unit squares the area of a figure
is counted as the number of unit squares web the area
of a figure is the number of squares required to cover
it completely like tiles on a floor area of a square
side times side since each side of a square is the same
it can simply be the length of one side squared if a
square has one side of 4 inches the area would be 4
inches times 4 inches or 16 square inches web area is a
quantity that describes the size or extent of a two
dimensional figure or shape in a plane it can be
visualized as the amount of paint that would be
necessary to cover a surface and is the two dimensional**

counterpart of the one dimensional length of a curve and three dimensional volume of a solid web area of circle triangle square rectangle parallelogram trapezium ellipse and sector area of plane shapes area is the size of a surface learn more about area or try the area calculator triangle area $\frac{1}{2} b h$ b base h vertical height square area a^2 a length of side rectangle area $w h$ w width h height parallelogram web the area of a two dimensional shape or geometric figure is the space contained within its perimeter area formulas of common shapes the exact area of many common shapes can be calculated using well defined formulas circle the area of a circle with radius r is πr^2 triangle the area of a triangle with base b and height h is web area noun ar ea 'ar ē ə 'er 1 a particular piece of ground or extent of space often set aside for special use a picnic area a waiting area 2 the surface inside a figure or shape especially the number of unit squares equal to the amount of space the surface covers a circle with an area of 500 square meters 3 region sense 2a a farming area web what is area area is the size of a surface example these shapes all have the same area of 9 it helps to imagine how much paint would cover the shape area of simple shapes there are special formulas for certain shapes example what is the area of this rectangle the formula is area $w h$ w width h height web an easy to use free area calculator you can use to calculate the area of shapes like square rectangle triangle circle parallelogram trapezoid ellipse octagon and sector of a circle formulas explanations and graphs for each calculation area of a triangle calculation using all different rules side and height sss asa sas ssa etc
